- Lifts up to 600 lbs.
- Prevents injuries

THE LATEST in lift innovation

The Volaro Rescue lift is designed to prevent lifting related injuries to EMTs while lifting someone during an ambulance call. The Volaro Rescue Lift weighs 46 pounds in the carrying case and can lift 400 pounds. The Heavy Duty Kit increases the lifting capacity to 600 pounds.

The Volaro Rescue Lift sets up in about a minute and works in the smallest bathroom. It is easy to use. The telescoping legs allow adjustment on uneven surfaces.

The Volaro Rescue lift fits in a sturdy canvas bag. The bag can stand upright or lay down for storage. It also has rollers for easy transport.
